ABA THERAPY

We Rock The Spectrum
KID'S GYM
For All Kids

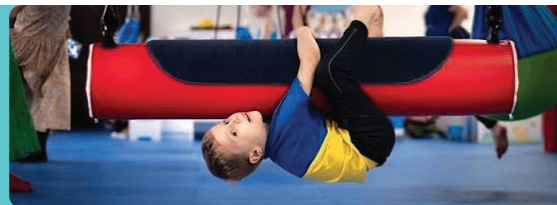

Watch a child walk into We Rock the Spectrum.

That natural pull toward movement, play, and other kids is one of the best starting points for real learning. The Carelinks Preschool Prep Program is built around exactly that.

Your child gets to be somewhere they actually love to be, working with a dedicated therapist on skills that are going to matter in the future.

The goal is school readiness. → The environment makes it feel like play.

the program

Your child receives one-on-one therapy with a dedicated therapist in a preschool-prep setting, while also participating in structured group activities that foster social, communication, and school-readiness skills. Every session is supervised by a BCBA.

What the program works on every day:

- Communication and language development.
- Social skills and peer play.
- Following routines and group directions.
- Managing emotions and building flexibility.
- Fine and gross motor skills.
- Self-help and daily living skills.

The team you trust,
the approach you know, and
the standards families across Iowa,
Missouri, and New Mexico rely on.
We Rock the Spectrum is the setting.
Carelinks is the support.

How is my child eligible?

An Autism diagnosis and active insurance coverage are required. Our team walks you through every step.

How does insurance work?

We bill directly. Families pay only their plan's standard costs. No additional fees. Medicaid accepted.

Is this still therapy?

Yes. Every session follows your child's individualized treatment plan, supervised by a BCBA.

Does this replace home-based therapy?

Many families use both. We build a plan around what works best for your child.

ALSO AVAILABLE: AFTER SCHOOL PROGRAM
FOR AGES 5+, WEEKDAYS 3-6 PM WITH FLEXIBLE
WEEKEND SESSIONS.
